/Main arias at Innovatum Science Park

Sustainable industry, Renewable energy and Blue bioeconomy (seafood and marine biotechnology)

PROJECT

Multi-use for large scale seafood production

Financers:

ERUF, Tillväxtverket, VGR, Region Halland

Partners:

Falkenberg municipality
Fyrbodals municipal association
Innovatum Science Park (lead)

Aim: Build capacity for large-scale seafood production through multi-use scenario development.

Goal: Drive growth, job creation, and green transitions in coastal areas by promoting engagement, enhancing innovation hubs and building value chains.

WP 1

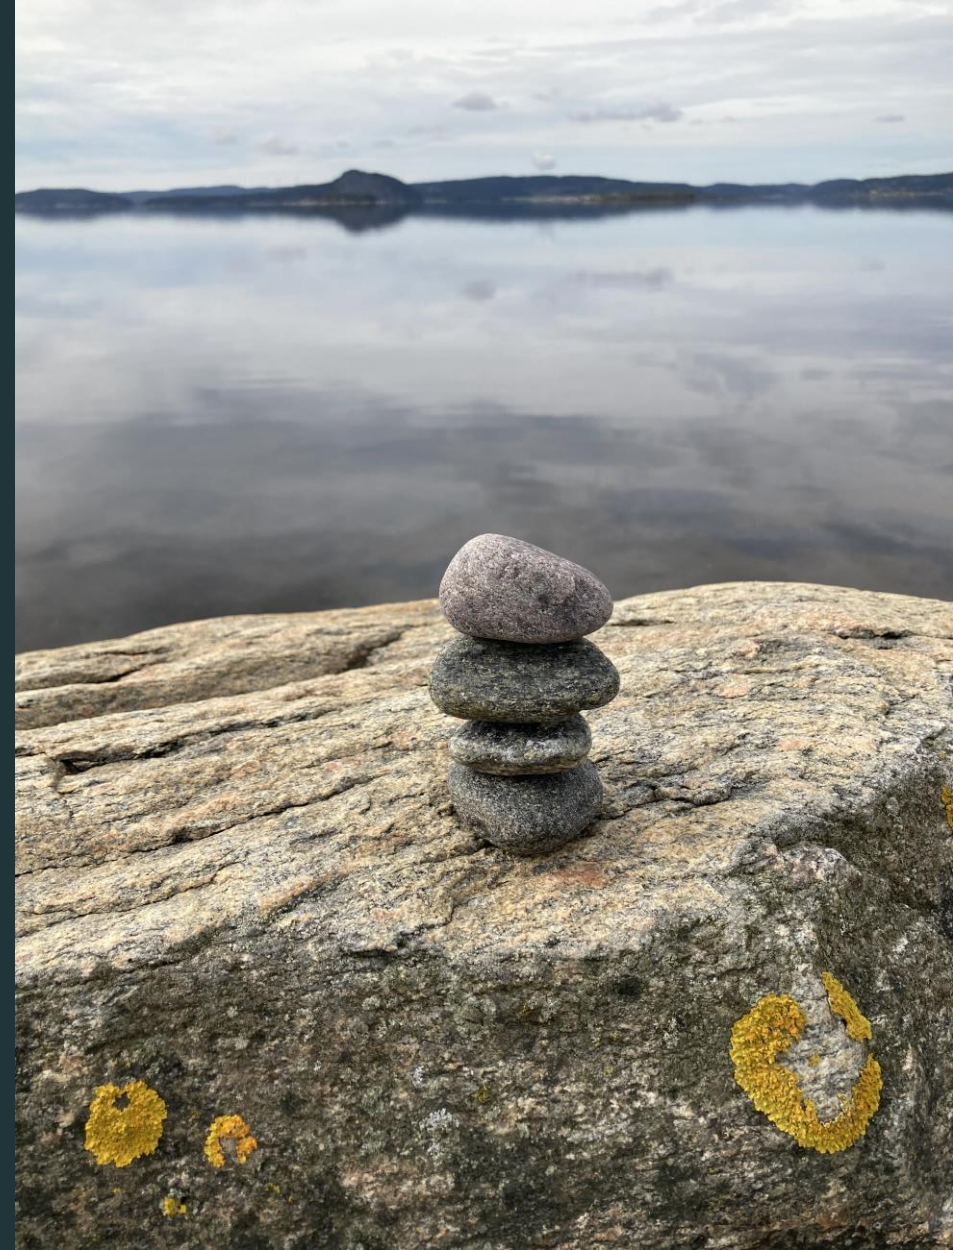

Project Management
Communication

WP 2

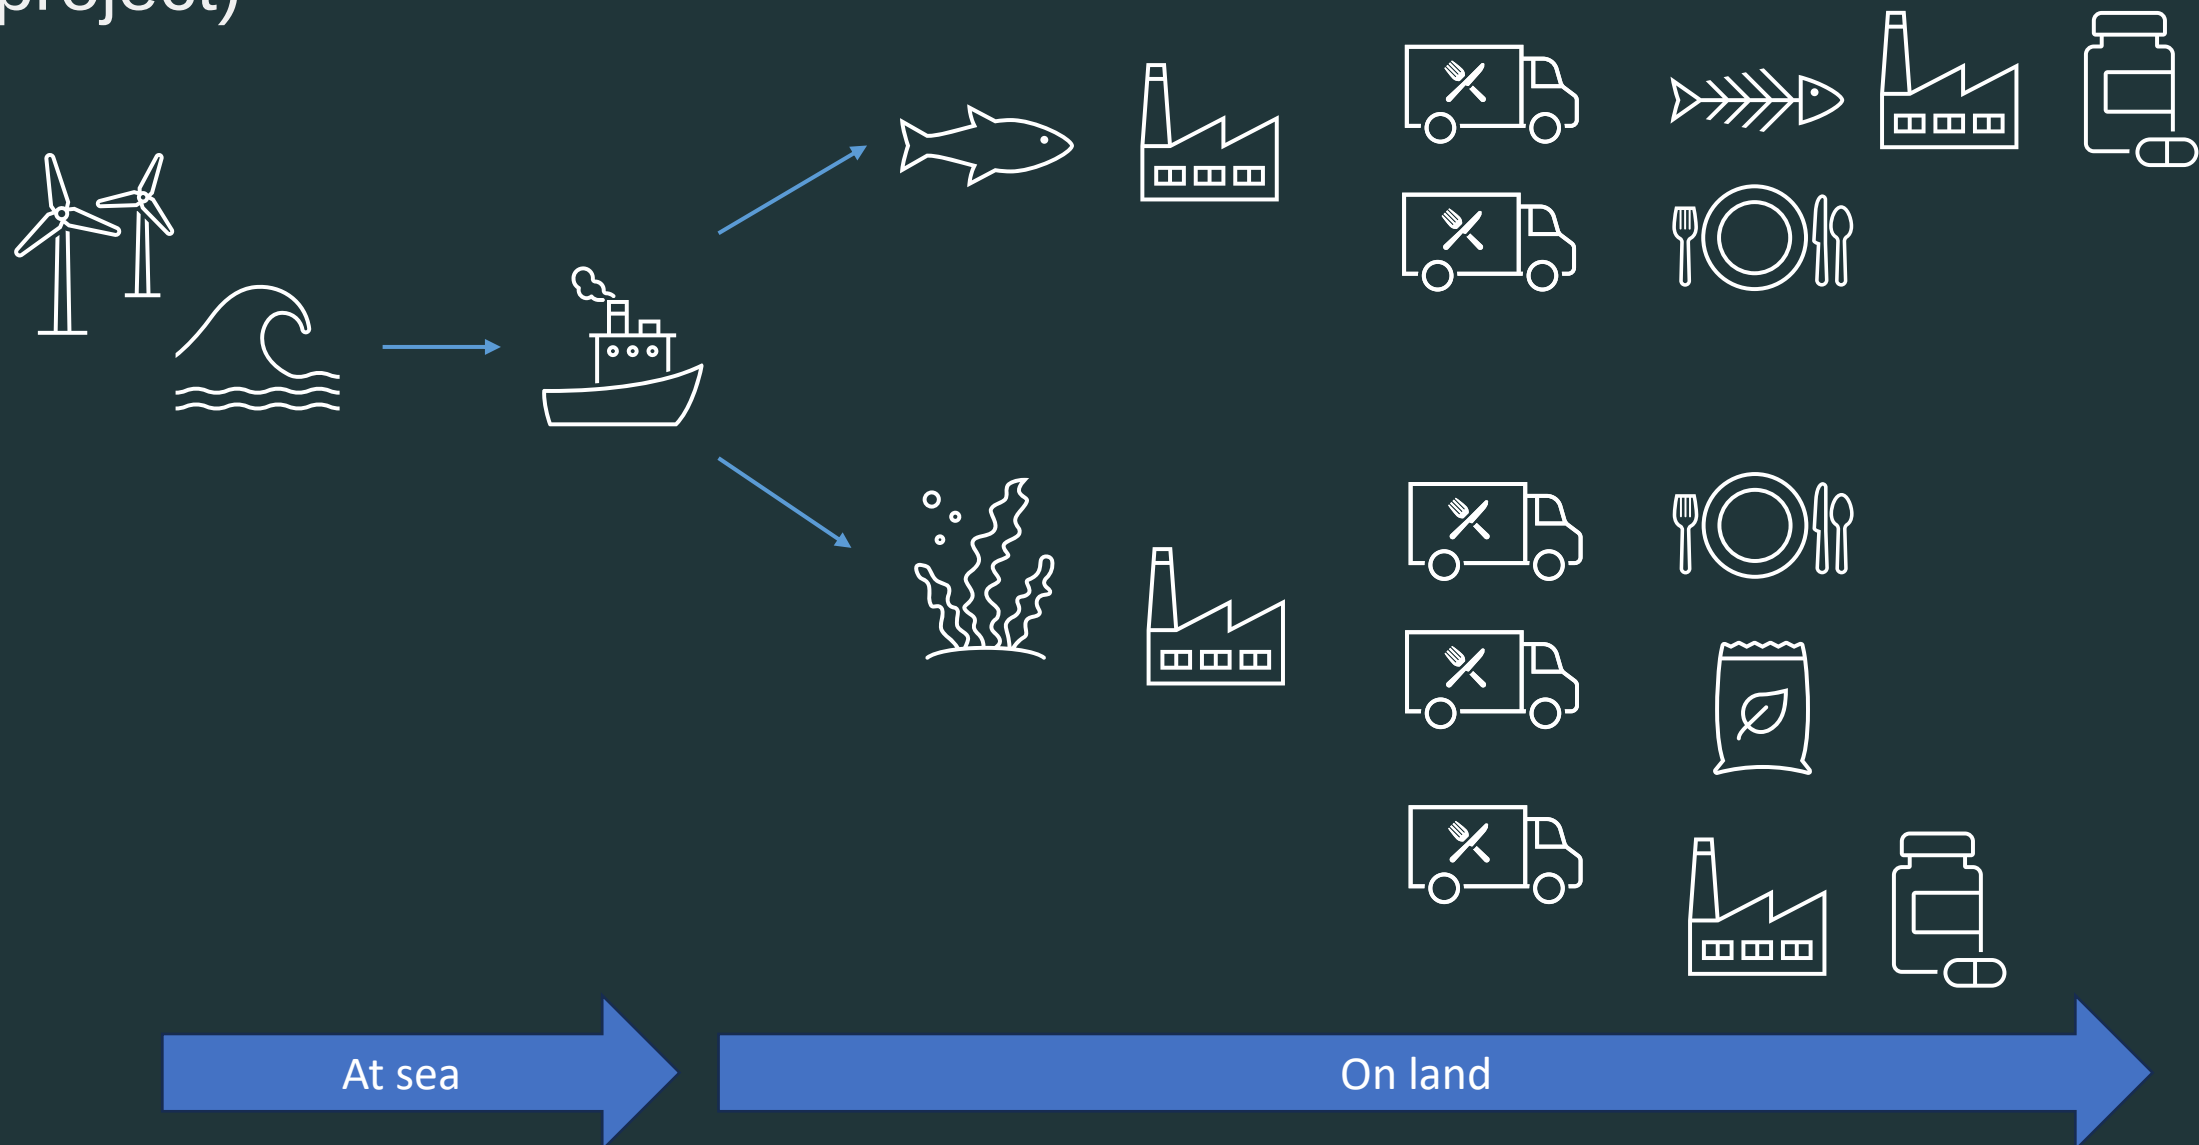

Collaboration and
knowledge building incl.
workshops, dialogue
meetings, study visits

WP 3

Case analysis of
examples for Multi-
use incl. Value Chain
analysis, T&D needs,
industry synergies

The aquaculture valuchain (within the scope of the project)

Multi-use scenarios: ex. offshore wind + aquaculture

➤ Regional development:

Västra Götaland, Halland

➤ Municipalities:

Lysekil, Falkenberg, Varberg

➤ Companies:

Alg/fisk: Kobb, Nordic Seafarm, Blue Fields, Subfarm

Processing: Upcyklr

Energi: OX2, Freja Offshore, Vattenfall

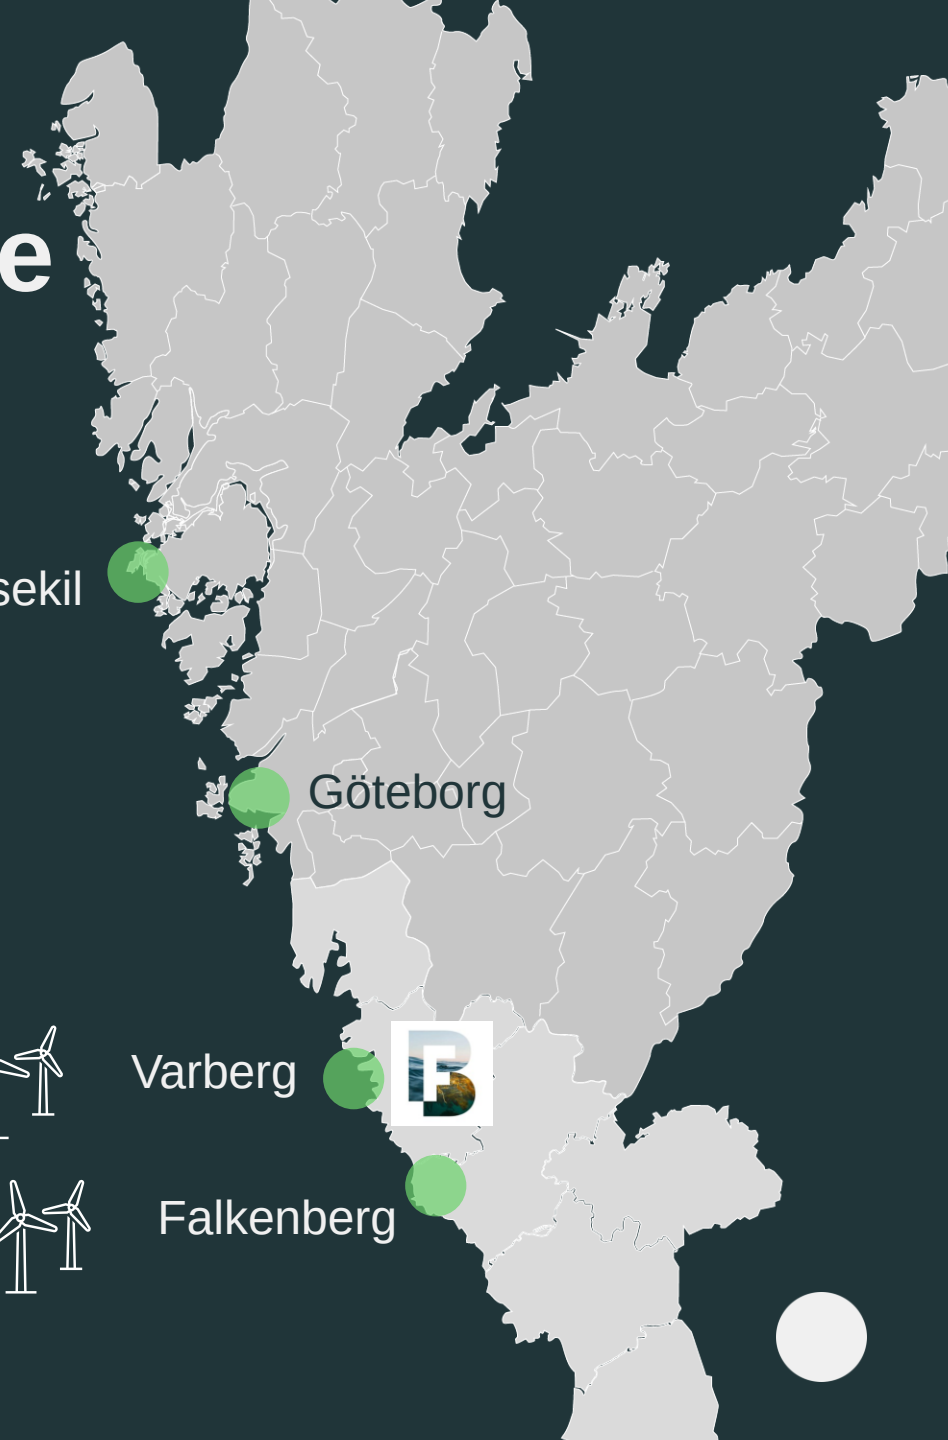

Lysekil

Varberg

Falkenberg

Work packages

WP1 Project management and communication (Innovatum)

- 1.1 Project management and administration
- 1.2 Communication

WP2 Collaboration and knowledge building

- 2.1 Knowledge-building efforts (Innovatum, Fyrbodal, Falkenberg)
- 2.2 Dialogue and collaboration (Innovatum, Fyrbodal, Falkenberg)

AP3 Local examples for multiuse

- 3.1 Current situation and local conditions (Innovatum, Fyrbodal, Falkenberg)
- 3.2 Test and demo (Fyrbodal, Falkenberg)
- 3.3 Conclusions and result dissemination to other public actors (Innovatum)

Total budget: 5 597 718 SEK

Project duration: 240901-261231
